

FARM SINK CUTOUT AND CAPPED CUTOUT WAIVER AND RELEASE

CUSTOMER: _____ PO NUMBER: _____

Counter-Form does not recommend capped cutouts for Farm/Apron or Undermount sinks. Countertops with a Farm/Apron or Capped sink cutout will not be warrantied by Counter-Form.

If you proceed:
Counter-Form requires all countertops with a Farm/Apron Sink or Capped cutout to be manufactured with Med-Ex core. These materials will add an extra moisture resistance to the countertop.

This does not make the top waterproof.

The countertop core will still swell if exposed to moisture for an extended period of time. Faucet holes must be siliconed before the faucets are installed.

If Farm/Apron Sink -- Counter-Form will need the sink with the reveal clearly indicated. Other sinks, the sink template is preferred to be sent to Counter-Form with the reveal clearly indicated. If no template is available, Counter-Form will need the sink with the reveal clearly indicated.

The undersigned acknowledges and agrees to the above terms and conditions.

COUNTERTOPS WILL NOT GO INTO PRODUCTION UNTIL WAIVER IS RETURNED WITH AUTHORIZED SIGNATURE.

UNDERMOUNT SINK IN DIAGONAL SINK CABINET WAIVER AND RELEASE

CUSTOMER: _____ PO NUMBER: _____

Counter-Form does not recommend the installation of our undermount sinks in a diagonal sink cabinet, when ordering a postformed edge.

The sinks are installed across miters and water damage may occur.

Tops may also have to be picked up.

Counter-Form will not warranty the tops or be responsible for the handling OR installation of sink tops once they are off our delivery truck.

The Applied Edge would be an option to eliminate miters in the sink area.

The undersigned acknowledges and agrees to the above terms and conditions.
