

In 1976 Counter-Form LLC. began operations, focusing on a single goal: To make the highest quality postform countertop in the industry at an affordable price, while providing its customers with the best in service. Today, although techniques and product lines have changed, our goal remains the same. Counter-Form offers unsurpassed experience, from our office staff to our fabricators. We offer quick lead times and the best in customer service. Discover why Counter-Form is an industry leader.

Counter-Form crafts a complete line of custom, cut-to-size countertops with all the colors and patterns available from Wilsonart®, Arborite®, Formica®, Pionite®, and Nevamar®. We stock over 190 of their best-sellers and offer many different edge profiles. Counter-Form can fabricate an almost infinite array of creative possibilities.

On the surface, laminate countertops all look pretty much the same. It's what's underneath that separates Counter-Form from the rest! Constructed from the highest quality industrial board, all of our countertops feature a 1/2" solid pine scribe for easier installation. Another unique feature is the vapor barrier strips we apply to the front and side edge to protect against moisture and chipping. With Counter-Form quality countertops, what you don't see makes all the difference!

MANUFACTURER'S WARRANTY

Any of our products found to have a manufacturing defect within one year from purchase will be handled in the following manner:

1. We will ship, to our dealers "point of delivery", all materials supplied by us.
2. In as much as Counter-Form LLC has no control over installation or fabrication on the job, **no warranty is expressed or implied in reference to installation, plumbing or labor of any manner.**
3. At our option, before shipping materials, we may request to inspect the job.
4. All materials coming off the job become property of Counter-Form LLC.
5. Credit will be issued when countertops are returned to Counter-Form LLC and we have determined that it is a manufacturing defect.

IMPORTANT: BEFORE INSTALLING TOPS

- **Water damage voids the warranty! Installer/plumber must seal all raw exposed particle board.**
- **WARRANTY covers replacement of tops ONLY. No labor costs.**
- CHECK CONDITION OF TOPS BEFORE INSTALLING. If your tops came with poly on them, take the poly off and inspect tops before assembling.
- DRY FIT COUNTERTOPS and if there are any issues, DO NOT GLUE and ASSEMBLE.
- TOPS SHOULD BE SET ON LEVEL CABINETS AND ALLOWED TO ACCLIMATE. If tops were subject to high humidity, they may need more time to acclimate to the surrounding.
- MAKE SURE MITER JOINTS ARE CLEAN. Using a paint brush, COMPLETELY coat each raw edge of miter joint with waterproof glue.
- Quickly align tops and tighten miter bolts. Open times vary depending on glue manufacture. Splined Miters help with alignment but all miters have to be adjusted. While tightening each miter bolt, a small block of wood can be used to "TAP" on the deck of the countertop so laminate does not get damaged. Working from front to back, line up tops so laminate is flush, then tighten bolt, repeating for each bolt.
- Clean off excess glue with a damp cloth.
- Warranty is void if joints are not properly assembled.
- Color matched seamfill is available for final touch-up.
- TOPS ABOVE DISHWASHERS SHOULD BE SEALED. The area above the dishwasher is exposed to moisture. Vents on top of door can cause damage quickly.
- STOVES and COOKTOPS MUST BE SET AT A HEIGHT ABOVE THE COUNTERTOP. This will prevent end caps from high heat which could cause delamination.
- ALL FAUCET HOLES CUT NEED TO BE SEALED. Use a good silicone to seal all raw particle board exposed to prevent water damage.
- DO NOT EXPOSE MITER SEAMS TO STANDING WATER OR SET COFFEE POTS OVER SEAM. WATER DAMAGE IS PERMANENT AND IS NOT A WARRANTY ISSUE.

CARE & MAINTENANCE

1. Do not expose miter seams to standing water or set coffee pots over seam. Water damage is permanent and is not a warranty issue.
2. STOVES and COOK TOPS must be set at a height ABOVE the top of your counter top. This will prevent end caps from excessive heat that could cause them to release.
Tops above dishwashers should have area above dishwasher sealed to prevent moisture damage. Vents on top of door can cause damage quickly.
3. FAUCET HOLES - All holes drilled through the top MUST be sealed with silicone. All raw particle board must be sealed to prevent water damage.
4. Use a damp cloth or sponge with a mild NON ABRASIVE detergent for cleaning. Then rinse thoroughly and wipe dry with a clean soft cloth.
5. For tougher stains, a SOFT BRISTLED brush may be used. Abrasive cleaners WILL cause premature wear.
6. ALWAYS use a cutting board when slicing to avoid cuts & scratches. Any sharp object can scratch the surface.
7. ALWAYS use hot pads to protect the surface from hot pans, as enough heat will damage the surface.
8. NEVER SLIDE “stoneware” across the surface, as it is very abrasive, and will cause scratches and premature wear.
9. Polishes such as “Hopes Counter Top Polish” can help by reducing friction.
10. Certain household chemicals WILL DAMAGE the surface, including:

Toilet Bowl Cleaners
Drain Cleaners

White Vinegar
Hydrogen Peroxide

Oven Cleaners
Stain & Rust Removers

Bleach
Anti-Bacterial Formulas

If any of these items come in contact with the surface, IMMEDIATELY clean that area very thoroughly and wipe dry with a clean soft cloth. Following these guidelines, your countertop should remain looking new for many years.

Special Tip

Always rinse laminate after cleaning! Failure to rinse after cleaning is the single greatest cause of damage to a laminate surface. If even a small amount of cleaning solution remains on the surface, moisture from cups or dishes can reactivate it and result in permanently-etched scars. Always rinse thoroughly with clean water and dry with a soft, clean cloth.

3-4-5 RULE

Use this rule to check for square (90°) corner.
Corner is square if 3-4-5 rule works.

Counter-Form, LLC makes every effort to ensure you receive your materials as ordered. We are committed to providing excellence in craftsmanship and service. Please read and review the following terms and conditions of your purchase:

MEASUREMENTS:

The buyer is responsible for the accuracy of all measurements supplied to Counter-Form. Counter-Form accepts no responsibility or liability for measurement errors. The customer is responsible for the final design approval.

DELIVERY LEAD TIMES:

All delivery times are estimates. Custom edge, undermount sinks and non-stock colors may have extended lead times.

JOB SITE DELIVERIES (COMMERCIAL & MULTI UNIT)

The majority of our shipments are handled in-house by Counter-Form. We employ a fleet of delivery vehicles and drivers to ensure damage-free, on-time deliveries. There is a fee of \$110 per job site delivery. Assistance is required for unloading of product at job site deliveries, a date and time will be scheduled. If no person is available, additional fees could be assessed. Job sites must be accessible for large truck delivery.

INSPECTIONS

Upon receipt of delivery, materials should be inspected for damage. Claims need to be notated on delivery receipt or reported to the Counter-Form Customer Service Department immediately. If a return is required, contact the Counter-Form Customer Service Department to arrange for return authorization.

RETURNS

To be eligible for a return or exchange, begin by contacting your customer service representative. The product must be in its original condition and damage-free, all returns will be inspected and an estimate on rework will be provided (see Rework below). Custom ordered products, and Special Orders may not be returned. There is a \$50 minimum for pick-up/delivery with a Counter-Form truck when not on a scheduled route. Shipping and delivery charges are non-refundable. Return authorization is required for all product drop-offs at the Counter-Form facility.

CHANGE ORDERS

Contact your Counter-Form customer service representative for all order changes. Orders prior to entering production can be changed at no charge. For orders that are in production (shop floor), changes may be limited and

will have a \$25 fee applied.

REWORK

Rework orders should be coordinated with our Counter-Form customer service team. Charges for rework will apply, consult this price book for costs associated, a \$25 shop handling fee will be applied to each order. Special miter recuts have a \$50 minimum charge and other shop time duties will be assessed at \$75 per hour, please note that in some cases, it may be more cost effective to simply reorder. Pick-up and delivery fees apply.

NON WARRANTY WAIVERS

Additional waiver releases are required for specialty application work. Applications that include Farm sink cutouts, capped cutouts and undermount sinks in diagonal sink cabinets do not qualify for the Manufacturer Warranty coverage. A signed waiver will be required before this work can be completed. Please allow an additional 1-2 week lead time. Waiver forms are available on pages 63-64 or by contacting your Counter-Form customer service representative.

NON STOCK LAMINATE

Additional lead-times may be incurred depending on supplier availability. Estimated delivery dates are supplied with the order acknowledgment. Laminates not stocked at Counter-Form may need to be purchased in full sheets, a line item charge for balance of sheet will be noted on the quote/acknowledgment.

Accuracy of quote is dependent on information provided - please complete form in its entirety

PRE-ORDER GUIDELINES

1. Steps taken by Counter-Form for pre orders:
2. Orders are entered into our system with sizes that are provided.
3. Laminate is ordered to accommodate that size top. (Example: Kitchen top size is 90", we order 30"x96" laminate, if the top were to change to 99", we could not use the 96" pc. and would reorder 120" pc. You would be responsible for the 96" pc.)
4. Received laminate is set aside for that order until the customer needs it.
5. When final sizes are received, tops will be put into production.
6. Pre-orders will be accepted one month in advance. All pre-orders must have a P.O. number and a contact name. Any pre-orders that change are subject to extra laminate charges and the balance of laminate will be delivered with the tops.
7. If final orders are not received within one month of pre-order, laminate will be delivered and invoiced to the customer.
8. NOTE: If Applied Edge sticks are pre-ordered, the color cannot be changed. Counter-Form does not make the sticks.

Spline insert

101

Post Formed Tri-Cove Top
Standard Kitchen 25-1/2" deep
Standard Vanity 22-1/2" deep
Special Depth 19" to 34"
Under 19" or over 34" deep requires screwed on backsplash

102

Post Formed top with Padding applied
2-9/16" x length of top

Assembled miter splice
for tops over 144"
up to 157"

103

Equal Depth Tri-Cove Tops, mitered together
Standard Miter 90, 22-1/2 or 45 degrees
Any other degree is a special miter.

104

Different Depth, Tri-Cove Tops, mitered together
Special Miter

104Z

Depending on difference in depth,
may need Z-miter.

105

Different Depth Tri-Cove Tops, mitered together where one or both tops have a SCREWED-ON backsplash.

All are special miters.

106

Tri-Cove Top, mitered to island top

Standard Miter 90, 22-1/2 or 45 degree

Any other degree is a special miter

Nose Cap required on end of backsplash.

107

Dog Leg Miter

Tri-Cove Top, mitered to island top where island top is narrower than tri-cove top

Nose Cap required on end of backsplash.

108

Equal Depth Island Tops, mitered together

Standard Miter 90, 22-1/2 or 45 degree

Any other degree is a special miter.

109
Different Depth Island
Top, Mitered Together
All are special miters.
Eased outside corner is
recommended.

109Z

Depending on difference in depth, may
need Z-miter.

110

Tri-Cove Top, Mitered to Single Edge Top
Standard Miter 90, 22-1/2 or 45 Degrees
Any other degree is a special miter.

111

Chimney Notch
Available With or Without:
L-shaped Square Edge Splash or
L-shaped Rolled Splash (attached)

112

Notch and Fill-In
Backsplash is removed and top is filled in flat to wall.
Nose Cap required when end of backsplash is
exposed.

113

Notched and SCREWED ON Backsplash
Island Top is notched out and backsplash is screwed on.
Nose Cap required when end of backsplash is exposed.

114

T-Splice
Island top miter to rolled edge of tri-cove top or another island top.

115

Reverse Miter
Equal Depth or Special Depth Tri-Cove Tops
Standard Miter 90, 22-1/2 or 45 Degree
Any other degree is a special miter

116

Diagonal Reverse Miter

117

Diagonal Corner Wall

Diagonal splash is SCREWED ON.

118

Standard Lazy Susan Corner

Standard Miter 22-1/2 Degree Cuts

Any other degree is a special miter.

If wall runs to corner, corner shelf is available.

119

Notch and Fit Diagonal Front with no sink

Front edge come attached.

120

Notch and Fit Diagonal Front With Island Top and No Sink

Front edge come attached.

Nose cap is included.

121

C.F.C. Corner

Center section comes SCREWED ON
backsplash.

122

C.F.C. Corner With Island

Center section comes SCREWED ON
backsplash.

123

Notch and Fit Front Edge With Sink

124

Notch and Fit Recessed Front Edge With Sink

125

Lazy Susan With Recessed Front
If wall runs to corner, corner shelf is available.

126

Diagonal Range
Diagonal splash is SCREWED ON.

127

Stove Cut Out/3 Sided Cut Out
Cut out may have square or rounded corners.
Cut out may be capped or left raw.

128

Angle Cut and Cap

129

Double Angle Cut and Cap

For use with angle corner base cabinet

130

Banjo Cut Out

Cut out may have square or rounded corners.

131

Notch for Square Edge End Splash

End splashes are not attached.

(Square Edge Glass Rail)

132

Bar Top with Screwed On Glass Rail

Available 3/4" With 1-1/2" Edge or 1-1/2" Solid

All with backer sheet applied.

(Coved Edge Glass Rail)

134
Radiused Corner
Available from 2" on up in 1" increments.

135
Radius End of Island

136
Cap Exposed End of Backsplash
(When mitered to an island top)

SIDE SPLASH DIAGRAMS

Standard Square Side Splash for All Edge
 Note: Screw on splash comes loose and will add 1-1/4" to overall length of top.

7/16"
 Set On Contoured Front & Back for Standard (tri-cove) Side Splash
 Standard Sizes: 25-1/2" w/3" B.S.
 25-1/4" w/3-3/4" B.S.
 25" w/4" B.S.
 22-1/2" w/3" B.S.

7/16"
 Set On Contoured Back Only Side Splash

7/16"
 Set On Contoured Front & Back for "D" Edge Side Splash
 Standard Sizes: 25-1/4" w/3" B.S.
 22-1/2" w/3" B.S.

7/16"
 Set On Contoured Front & Back for 180° Edge Side Splash
 Standard Sizes: 25-1/4" w/3" B.S.
 22-1/2" w/3" B.S.

FARM SINK CUTOUT AND CAPPED CUTOUT WAIVER AND RELEASE

CUSTOMER: _____ PO
NUMBER: _____

Counter-Form does not recommend capped cutouts for Farm/Apron or Undermount sinks. Countertops with a Farm/Apron or Capped sink cutout will not be warranted by Counter-Form.

If you proceed:

Counter-Form requires all countertops with a Farm/Apron Sink or Capped cutout to be manufactured with Med-Ex core.

These materials will add an extra moisture resistance to the countertop.

This does not make the top waterproof.

The countertop core will still swell if exposed to moisture for an extended period of time. Faucet holes must be siliconed before the faucets are installed.

If Farm/Apron Sink -- Counter-Form will need the sink with the reveal clearly indicated.

Other sinks, the sink template is preferred to be sent to Counter-Form with the reveal clearly indicated. If no template is available, Counter-Form will need the sink with the reveal clearly indicated.

List prices are as follows:

* allow additional 1-2 week lead time *

Med-Ex core.....add.....\$4.68/per Square Foot

The undersigned acknowledges and agrees to the above terms and conditions.

Customer First & Last Name (PRINT) _____

NOTE:

COUNTERTOPS WILL NOT GO INTO PRODUCTION UNTIL WAIVER IS RETURNED WITH AUTHORIZED SIGNATURE.

LLC.

UNDERMOUNT SINK IN DIAGONAL SINK CABINET WAIVER AND RELEASE

CUSTOMER: _____ PO NUMBER: _____

Counter-Form does not recommend the installation of our undermount sinks in a diagonal sink cabinet, when ordering a postformed edge.

The sinks are installed across miters and water damage may occur.

Tops may also have to be picked up.

Counter-Form will not warranty the tops or be responsible for the handling OR installation of sink tops once they are off our delivery truck.

The Applied Edge would be an option to eliminate miters in the sink area.

The undersigned acknowledges and agrees to the above terms and conditions.

Customer First & Last Name (PRINT) _____

Customer First & Last Name (SIGNED) _____

NOTE:
COUNTERTOPS WILL NOT GO INTO PRODUCTION UNTIL WAIVER IS RETURNED WITH AUTHORIZED SIGNATURE.

MANUFACTURER'S WARRANTY

Wood is a natural material, sensitive to environmental humidity. It will move considerably in response to extremes in surrounding conditions. Just as no two trees are alike, no two pieces of wood used in the fabrication of our tops reacts exactly as another. As with any natural wood product, our butcher block tops can expand and contract in response to the particular environment in which they are located. It is important that a stable humidity of 35% to 45% is maintained in order to insure continuous stability.

Wood also has naturally occurring variations of color. This is not considered a manufacturing defect but instead is viewed as part of the unique beauty of this natural product.

It should be noted that it is the responsibility of the receiver to closely inspect all product before accepting any shipment. Additionally, it is the responsibility of the installer to inspect the product prior to installation. Any manufacturer's defects should be immediately brought to Counter-Form's attention. Failure to do so could affect the outcome of any claim. Counter-Form cannot be held responsible for errors in installation or alteration.

Counter-Form's Butcher Block product is warrantied for a period of 1 year against manufacturer's defects. The product is not warrantied if modified in any way. The warranty is also void if at the request of the purchaser, we ship an unfinished block. Since Counter-Form has no control over the environment, timing of the installation or the conditions in which the block is stored, we cannot be responsible for a natural reaction of the unfinished wood to its surroundings.

Warranty covers materials only. **Labor costs will not be covered.**

Sink or cook top cutouts must be completed by Counter-Form in order to maintain warranty.

A sink cutout is usually associated with increased moisture; therefore, regardless of whether the sink is drop-in or under mounted, the edge grain of the sink cutout must be carefully sealed. The sink's edges must be caulked properly, in order to prevent water infiltration between the sink and the wood surface.

Counter-Form reserves the right to qualify any claim on our products and does not include or consider labor or other non-material charges as part of the claim.

IMPORTANT MITER NOTES & SUGGESTED ASSEMBLY

- All miters will have splines and miter bolts unless otherwise specified
- All miters will be treated with the same oil as applied to the top surface. Polyurethane-base varnish can be used if requested.
- Miters can be assembled 3 recommended ways:
 1. Silicone – gives you a flexible joint
 2. White glue – gives you a ridged joint
 3. Nothing – joint can be corrected if wood shifts

CARE & MAINTENANCE

1. To kill bacteria, often left behind by raw meat, with bleach. Add one tablespoon of bleach into one gallon of warm water.
2. Remove tough stains from butcher block by pouring lemon juice on the surface and letting it soak for several seconds.
3. Maintain oiled butcher block with non-toxic oil treatments on a weekly basis or whenever you notice the wood drying or color fading. Coat the butcher block with oil, let sit for five minutes then wipe away the remainder with a paper towel or cotton cloth. Wait 12 hours before using the butcher block.
4. Clean oiled butcher block on which food is not usually prepared, with water and gentle soap. Wipe dry with a soft towel. Butcher block finished with a polyurethane-base does not need oil treatments.
5. Avoid harsh detergents, chemicals, direct sunlight, and puddles of standing water. Sand out light scratches, dents and dings with high grit sandpaper. Recondition or oil when wood gets dull or shows signs of cracking or aging.

SPECIAL TIPS

1. If a dishwasher is installed underneath a butcher block countertop, a moisture barrier must be applied to the bottom side of the top, in order to give additional protection against heat and moisture.
2. Ideally, butcher block should be stored flat against the ground. Do not store the butcher block outdoors, in an excessively dry or moist environment, or near a heat source.
3. Conditions that will cause problems:
 - A) Humidity in the room is below 35% (too dry).
 - B) Area is heated with a wood burner.
 - C) Butcher block is installed near a heat source.
 - D) Constant exposure to direct sunlight.

Company Name: _____

PO #: _____

SINGLE WOOD SPECIES - SELECT ONE
